

Tejas Manohar

Software Engineer and Entrepreneur

(615) 974-7843

me@tejas.io

EXPERIENCE

AutoLotto, San Francisco — Lead Engineer

April 2015 - PRESENT

Directing a full-stack engineering team to take a product from inception to growth. Designed and developed modular backend with RESTful API using ES6/7 (via Babel), Node.js, Express, and MongoDB.

HubSpot, Cambridge — Software Engineer Intern

May 2015 - August 2015

Contributed to Singularity, an open-source Mesos framework in Java Dropwizard and Backbone.js. Developed an automated interview scheduler frontend in React.js and ES6 following Flux design pattern.

Populr, Nashville — Software Engineer Intern

May 2014 - August 2014

Developed anti-spam agents, improved browser support, and setup caching, compression, and load balancing to scale a Ruby on Rails app.

OPEN-SOURCE

Node Schedule

Maintainer; Flexible job scheduler for Node.js allowing date-based scheduling with optional recurrence rules. ~30k downloads per month.

Boris

Maintainer; A tiny yet extensible REPL for PHP. Foundation of Laravel 4's built-in debugger named "tinker". ~250k downloads per month.

Koa

Contributor; Expressive HTTP middleware for Node.js to make developing web applications and APIs more enjoyable. ~60k downloads per month.

Singularity

ex-Maintainer; API and web app for managing Apache Mesos tasks — including long running processes, scheduled jobs, and one-off tasks.
